Neoclassical Economics Exploring Economics

The central research domains of neoclassical economics are: microeconomics, which analyses the behaviour of households and firms; macroeconomics, which examines economic aggregates and the interaction of markets; and econometrics, which serves as an analytical tool. Overall, mostly mathematical models are used in the analysis of the economic system. These models, according to neoclassical

When green isn't mean economic theory and the heuristics

The conventional neoclassical economic wisdom argues that the opportunity costs of environmental

regulations are high, with negative implications for costs and profits and, by implication, for growth and per capita gross domestic product (GDP).
