From the book reviews: In this book, some mathematical models arising in fermentation processes are presented. They are in the form of a nonlinear multistage system, switched autonomous system, time-dependent switched system, state-dependent switched system, multistage time-delay system, or switched time-delay system.

Optimal Control of State Dependent Switched Systems

In this chapter, we propose a state-dependent switched system to model fed-batch fermentation. An optimal switching control model is then presented. Because the number of the switchings is not known a priori, we reformulate the optimal switching control problem as a two-level optimization problem.
