This section provides basic information on neuroanatomical structures that are of clinical importance. Numerous examples of normal radiographs, CT scans, MRIs, and PET scans are also provided. Many cross-sectional diagrams have been included to stimulate students to think in terms of three-dimensional anatomy, which is so important in the interpretation of CT scans and MRI images.

NERVTRACK A neuroanatomical data bank ScienceDirect

To provide the neurologist with a detailed and easily accessible neuroanatomical reference, we have developed a data bank including all relevant efferent and many afferent neuroanatomical pathways. NERVTRACK contains 4000 anatomical data items arranged in a tree-like manner reflecting structural and functional relationships.

The brain basis of musicophilia evidence from

The present behavioral data indicate that musicophilia may be associated with relatively greater impairment of inter-personal social inference (see Table Table1): 1): considered together with the neuroanatomical findings, we propose that abnormal craving for music in this patient population is a marker for concomitantly less efficient interpretation of social signals; and more speculatively
